Rental Stage Set

The Big Fabric Thing

- Eight 25 foot tall by 4 feet wide white fabric panels hang upstage with an RP or FP screen at center (shown 9x12).
- We place two - 32 foot wide x 12 foot tall white fabric ground supported triangles downstage of the hanging fabric panels. This creates depth, visual interest and additional surfaces for lighting.
- For the last layer we have six varying height, 24 inch square vertical trusses covered with white fabric-- when lit from the front they appear to be solid columns and when lit from the inside the cords and diagonal piping create shadows for an industrial appearance.
