Rental Stage Set

The Magnificent Module

- This highly affordable set provides maximum flexibility and modularity. Individual 4'x4' and 4'x2' panels clip together to create a variety of columns or walls. Easily integrate our hard screen surrounds to complete the look.
- The panels are translucent plastic on black steel frames. Lit from behind with LEDs or other fixtures, they provide an infinite variety of eye-catching looks.
- This set creates almost unlimited options. The panels can be covered in woodgrain material for a boardroom look. Or swap out a few individual squares with another color, something metallic, or even a section of rear projection material for a look that helps communicate your message.
- Integrate banners, logos and images to let your set support your brand and tell your story.
- Sets up in a few hours with a small crew and comes down even faster. Ships in road cases, making it economical anywhere.
- Completely scaleable for any ballroom, trade show floor, party tent--you name it!
